Mainstream Technologies: A Unique Arkansas Brand

Mainstream Technologies is an Arkansas based technology provider that has been serving businesses, non-profits and public sector clients with custom software development, managed network services and hosting solutions since 1996.

Product Depth

- **Managed Services:** protecting your data and IT systems so IT becomes a true business driver
- **Custom Software:** peace of mind from getting the right result the first time, with less risk
- **Hosting:** putting IT in its place — out of sight, out of mind — so you can take care of business!

Customer Centric

- Easy to do business with: approachable and attentive, adapting to your particular needs with no long-term commitments
- Serving your core business needs with Mainstream's deep service lines, supporting your entire enterprise, and quickly adapting to business changes
- Smart Engagement: a unique delivery of custom software so you get more than what you knew you wanted

A Quality Brand

- Accredited and certified on international auditing standards
- Best practices in the constantly changing IT space
- Breadth and depth of skill sets
- Governor's Quality Award Achievement Award Winner 2014
