

## One in three breaches are caused by unpatched software vulnerabilities!

When software flaws are left open, they leave an organization at risk.

You rely on software to operate. New vulnerabilities are constantly being uncovered. Software vendors respond by publishing updates but it's up to you to install them.

Mainstream Technologies' Vulnerability Management service identifies these software flaws so they can be addressed.

$\checkmark$	Network Asset Profile Discover, document your network assets so nothing falls through the cracks	✓	<b>Comprehensive   Perimeter-less</b> Assets, regardless of location are identified and protected
$\checkmark$	<b>Threat Intelligence</b> Stay up to date on the latest advisories and software vulnerabilities	<ul> <li>Image: A start of the start of</li></ul>	<b>Flexible Management</b> We can triage or turn it over to your team
<b>√</b>	<b>Continuous Scanning &amp; Alerts</b> Identify, assess and remediate all software flaws in your enterprise	✓	<b>Reporting</b> Know where you stand from the initial alert to the final completion with a full history

Your biggest risks are the ones you are unaware of.

Don't let these issues overwhelm you.

Let us help identify, prioritize and determine where to start.

We are flexible. We can arm your team with the information they need to resolve these issues, or we can do it for you.

Remove the guesswork | Implement BEST PRACTICES with ease and certainty!
