"As a hosting company we understand the value of the services Mainstream Technologies provides us. This is why we use them as our second site."

Ken Harris Jr.
eMobile Campus

Hosting & Data Center Services

Customer Centric
- Variety of options including co-location, managed co-location or virtual servers (IaaS)
- Smart hands/live support
- 30-day no fault termination contracts

Cost control
- Avoid ineffective/overspending
- Minimize large repair expenses
- No additional costs when problems arise because we can manage the environment
- Reduce operational expenses associated with an on premise data center such as electrical, security, & staffing
- Leverage our economies of scale
- Better cash flow with consistent, predictable monthly spending

Flexibility/Availability/Security
- Proactive routine maintenance
- Supports compliance with government and industry regulations
- High-availability environment
- Multiple layers of physical and data security

Proactive responses to new, evolving IT requirements
- Planned upgrades and replacements are factored into our pricing so guesswork of when customer will have to pay for more cooling, power or infrastructure is eliminated
- Requires minimal planning on your part
- Cloud options: public, private, hybrid

Data Center Characteristics

> "Because of Mainstream Technologies' hosting services, we're able to respond to our clients' needs faster without increasing overhead."
>
> Jackie d'Escoto
> D'Escoto, Inc.
