

# Threat Monitoring & Detection

Reducing Risk & Liability Around Cyber Attacks

## Is Your Business Safe from Cyber Attacks?

Do you think your business is too small to be targeted for cyber-attacks? Think again. It's not a matter of if, it's a matter of when, as the majority of businesses face bankruptcy within 6 months of a cyber breach.

The assets you value most, like employee and customer data, bank account and credit card information, intellectual property and trade secrets can be exploited by hackers. Without the right security measures in place, there is real risk that these assets can fall into the wrong hands.

## Security Made Easy

### Stay Secure and Compliant

At Mainstream your data is protected in real-time greatly reducing your risk from a cyber threat while meeting your unique regulatory, audit and reporting requirements.

Mainstream provides advanced threat intelligence and the same level of security enjoyed by the largest companies in the world, all at a low monthly cost.

✓ Not just a tool, a **commitment to Best Practices**

✓ **24x7 SOC correlation and analysis** of event logs removes noise and detects suspicious activity

✓ Suspicious activity is triaged using knowledge of your environment to remove false positives and begin response actions that **alert you of actual attacks**

✓ For less than the cost of a security analyst receive **SIEM plus a SOC**

✓ Crucial **Detect** and **Response** services complement your **Identity** and **Protect** activities
