We Create, Manage, and Secure Technology

Since 1996, the professionals at Mainstream Technologies have focused on delivering technology solutions that help our clients get the most from their technology investment. We're committed to doing the right thing the right way.

Our solutions are tailored to meet your unique challenges, and your unique requirements. We value long-term, mutually beneficial partnerships. To that end, our services are audited annually to give you assurance that we are meeting your needs -- year in and year out.

Custom Software

We help solve your business challenges through innovative software solutions that add both value and preserve the accuracy of your data

Cybersecurity

You are ultimately responsible for the security of your systems and data. Our consulting and management services help you secure your environment, meet regulatory requirements, and maintain your client's trust

Managed IT Services

We offer a full spectrum of private cloud, virtualization, and colocation solutions so you have options to select which approach brings the most value to your organization.

Hosting

Business class network, endpoint, and consulting services that deliver peace of mind from knowing your systems are stable, secure, and working at peak performance.
